

India should take lead in 6G and set direction for world: Ashwini Vaishnaw at TDSAT

If not ahead of world on 6G, then no point in calling India as nation of talents: Ashwini Vaishnaw

New Delhi, Mar 13 (ANI): Union Communication Technology Minister Ashwini Vaishnaw inaugurated the TDSAT seminar on '25 years of TRAI Act' in Delhi on March 13. While speaking at the event, he said that if not ahead of the world on 6G then there is no point in calling India as nation of talents. "We have started working in 6G. Compared to the world, we were far behind in 2G and 3G. We were chasing the world in 4G. We have to walk with the world on 5G and if it is not ahead of the world on 6G then there is no point in calling India a nation of talents," said Ashwini Vaishnav.
