

Uttar Pradesh to host Global Investors Summit in Feb 2023, aims to attract Rs 10 lakh crore investments

Singapore, France, UK & Mauritius seek partnership in the event, a dozen more countries to join, roadshows will be organized in various countries before the summit

ETGovernment • September 30, 2022, 10:45 IST

Giving necessary guidelines regarding the roadmap for organizing the [Global Investors Summit](#) from February 10 to 12, 2023, Chief Minister [Yogi Adityanath](#) said that the event will give flight to the aspirations of 'New India, New Uttar Pradesh'.

The CM reviewed the preparations for organizing the summit in a high-level meeting on Thursday.

“Uttar Pradesh is going to organise the Global Investors Summit on 10th, 11th and 12th February 2023. This time we have to work with an investment target of Rs 10 lakh crore. This three-day Global Investors Summit will be unprecedented, historic and will give a new flight to the aspirations of Uttar Pradesh,” said a spokesperson.

Uttar Pradesh has emerged as a dream destination for industrial investment in the country by imbibing the Prime Minister’s mantra of "[Reform, Perform and Transform](#)". Uttar Pradesh is moving towards becoming the second economy from the sixth economy of the country.

According to officials, it is overwhelming that Singapore, France, UK and Mauritius have spontaneously sent proposals for their participation as partner countries in the Global Investors Summit. Similarly, communication should be established with the Ambassadors/High Commissioners of Netherlands, Canada, USA, Japan, Israel, Sweden, Thailand, France and Singapore in this regard, instructed the chief minister.

The Global Investors Summit, Uttar Pradesh will be a great platform for establishing the state’s brand image, said Yogi Adityanath, adding that they are going to organise roadshows in various countries before the summit to invite investors from all over the world to invest in Uttar Pradesh.

As per the proposed plan, the cooperation of industrial organizations like FICCI and CII would also be sought in organizing roadshows whereas the industrial organizations of these countries would also be contacted.

“Through roadshows, a conducive environment will be created in the industrial sector of different countries for the Global Investor Summit. The detailed route should be decided by selecting the countries and cities for the roadshow. Ministers will be the brand ambassadors of Uttar Pradesh in the International roadshows,” said the chief minister.

He further added that while deciding the route of the roadshow, experts from the sector in which investment is possible from the country concerned must be included in the team. The group to be headed by ministers should be decided and formed soon. The roadshow needs to be spectacular where we must showcase our culture along with the best industrial environment in the state.

Roadshows will be organised in Delhi, Ahmedabad, Mumbai, Kolkata, Bangalore, Hyderabad and Chennai in addition to overseas. In this regard, the necessary planning is being finalised by Invest UP, nodal agency for investment promotion in the state.

Uttar Pradesh has made its industrial investment policies more practical for the ‘Ease of Doing Business’, however, the process of policy reforms should be continued while interacting with the industrial world, keeping in mind the state's interests.

Along with the new industrial investment and employment promotion policy of the state, more than 30 sectoral policies including EV policy, toy, textile, pharma, startup, data center, green hydrogen policy should be prepared and presented prior to the investors' summit. While framing the policies, keep in mind that the policy provisions should be practical, employment generating and ensure a bright future of the youth.

Land is the primary requirement for setting up industrial units. Before the summit, we will have to expand the land bank so that the investors who come here do not face any problems with land for investment. Top priority should be given to this work.

Separate teams should be formed to ensure the success of GIS-2023. All the concerned departments should start preparations on war footing. Proper direction should be taken by communicating with the government of India.

CM directed the officials that incentives are being provided by the state government to encourage industrial units investing in the state. All such cases should be thoroughly reviewed and resolved without delay.
