

From green hydrogen to circular economy, govt goes for sustainable growth

A mere decade ago, climate change was not a matter of grave concern. Considering its profound implications and the impact it has on our daily lives, it has now become a topic of widespread discussion and concern.

The government has committed to get 50 per cent of its energy from renewable resources and to reduce total projected carbon emissions by one billion tonnes by the year 2030. New Delhi: As India emerges as the most populated country in the world with its power corridor Delhi leading the largest political party at a time when rapid climate changes are happening across the globe, it calls for an analysis of the BJP-led Central governments environmental initiatives.

A mere decade ago, climate change was not a matter of grave concern. Considering its profound implications and the impact it has on our daily lives, it has now become a topic of widespread discussion and concern.

Over the past nine years, the BJP-led Central government has launched various schemes to address climate change. These include the Green Hydrogen Mission, GOBARdhan (Galvanising Organic Bio-Agro Resources Dhan Scheme), the Green Credit programme, MISHTI, Amrit Dharohar, and more.
