LUCKNOW: The Uttar Pradesh government has worked out a monitoring system to ensure that it is moving ahead in the right direction and following the roadmap drawn to achieve the objective of boosting the Gross State Domestic Product (GSDP) to one trillion dollars in the next five years.

The government has worked out quarterly milestones and the Key Performance Indicators (KPIs) for all the sectors/departments, got feedback about them

and is regularly assessing the progress in various fields in the state.

Those aware of the development said the state government's monitoring system includes sectoral reviews and weekly video conferencing with the district magistrates and other district-level officers at the chief secretary's level to review implementation of the roadmap for the trillion-dollar economy goal.

"We have worked out a monitoring system. We have identified the KPIs for various departments and sectors and got feed-

back This will give us an idea whether the state government is moving ahead in the right direction to achieve the objective of making the state a trillion-dollar economy in the next five years. We are also developing dashboard for the purpose," said Alok Kumar-III, secretary, planning, and nodal officer for the one trillion-dollar economy project. He made a presentation about his department's performance before chief minister Yogi Adityanath last month.

The state government had signed a Memorandum of
