The Yogi Adtiyanath government of Uttar Pradesh has started preparations for setting up new IT hub in the capital Lucknow, said the government in a press release. This IT hub is expected to be India's largest.

The Uttar Pradesh Rajkiya Nirman Nigam (UPRNN) has already prepared a blueprint for setting up the IT hub on 40 acres in the Nadarganj Industrial Area of Amausi on Kanpur Road.

Officials said the IT hub will be divided into three parts, including IT Park, Business Park and International Incubation Facility Center. "The proposed IT hub will be one of the largest IT hubs in the country."

According to the blueprint of the IT Hub, IT Park is to be constructed on 11.47 acres, while the Business Park will be developed on 7.4 acres. Aside from that, the International Incubation Facility Center will be built on 6.9 acres, and a total of 8.7 acres of land will be developed as a green area to protect the environment.

In addition, a network of roads will be built on 5.8 acres to ensure connectivity between the buildings constructed in the IT hub.

IT Park, Business Park, and International Incubation Facility Center will be built in a six-storey building, including a basement and ground. All these three buildings will also have their parking facilities. The hydraulic parking system will be used in their basement parking, according to the statement.
