New Delhi: [Servokon Systems Ltd](#) on Monday announced its plan to invest over Rs 200 crore in setting up a new manufacturing facility in Hapur, Uttar Pradesh.

This facility, set to cover an area of 25,000 square meters, is part of Servokon's strategy to enhance its production capabilities. The foundation stone for the facility will be laid soon, it said.

In addition to contributing to the local economy with new employment opportunities, the plant will also increase the company's production capacity, focusing on [transformers](#) up to 220 KV class. Notably, the unit will house a dedicated section for in-house [solar panel](#) manufacturing.

Haji Kamruddin, Founder and Managing Director of [Servokon Systems Ltd](#) said, "The new facility will allow us to produce up to 220 KV class transformers and focus on in-house solar panel manufacturing. Our foray into renewable power and solar energy aligns with the government's goal of achieving [Energy Independence](#) while reducing carbon emissions."

Servokon Systems looks forward to the commencement of construction on this exciting new facility and anticipates its positive impact on the industry and the Hapur, Uttar Pradesh community. This expansion reaffirms Servokon's commitment to innovation and excellence in the power conditioning sector and its dedication to driving sustainable change in the green energy and renewable power sector.
