

UP e-ways to get electric vehicle charging stations

TIMES NEWS NETWORK

Lucknow: Electric vehicle owners will not have to worry about running out of battery while travelling on expressways in Uttar Pradesh.

The Uttar Pradesh Expressways Industrial Development Authority (UPEIDA) will setup 72 charging stations for electric vehicles along the five expressways in the state.

The work will begin in January next year.

At present, some electric charging points are available on Lucknow–Agra Expressway and Yamuna Expressway but they do not offer fast charging facilities.
