

# Noida-Gzb metro link to be integrated with rapid rail in Sahibabad

**Abhijay.Jha@timesgroup.com**

**Ghaziabad:** The Delhi Metro Rail Corporation (DMRC) has submitted a revised route plan to extend the Blue Line from Noida Electronic City and suggested that the last proposed station at Sahibabad be integrated with that of the Rapid Rail there.

The Sahibabad metro station — according to the DMRC report — will be built opposite the existing Sahibabad Rapid Rail station in Vasundhara. The two stations — on either side of the Link Road — will be connected by a foot overbridge. This will allow passengers to transit between the Blue Line and the Delhi-Meerut Rapid Rail corridor without having to exit the premises.

DMRC had submitted its first report to extend the Blue Line to Sahibabad in When work began on the Rapid Rail's alignment, DMRC was asked to

come up with a plan to integrate the stations at Sahibabad. "The focus now is on multi-modal integration. So, the 5.2km metro route will culminate at Sahibabad and will be integrated with the Namo Bharat station on the other side of Link Road," said Manvendra Singh, the chief engineer at Ghaziabad Development Authority, which had asked DMRC for the revised report.
