**Lucknow:** Stating that Uttar Pradesh would emerge as a model state for future India, chief minister Yogi Adityanath on Monday said that about 45% of the total mobile manufacturing in India is done here.

“Uttar Pradesh is a state with limitless possibilities offering growth opportunities in all sectors. It is emerging as a ‘model state’ for New India,” the CM said while speaking at ‘Ashwamedh Elara India Dialogue 2022’ virtually.

He added that the state has emerged as a ‘forerunner’ in bringing digital revolution to India. “The state has received scores of investment proposals in the field of data centres. In addition, to attract global investment, the state is going to organize a Global Investor Summit in January,” he stated.

Maintaining that improvement in the law and order situation in UP has eliminated the biggest roadblock that prevented the state’s growth, the CM said, “The air in UP has chang-

ed in favour of growth and development. There is rule of law and a dedicated single window system (called Nivesh Mitra) that has been developed offering numerous services ensuring ease of doing business.”

The CM also said that UP has scaled new highs in creating infrastructure which works as a magnet for investors. “Currently, there are 13 expressways in the state, out of which 6 have been completed and 7 are in the process. Over 25 airways are being developed for seamless air connectivity. Also, the Eastern and Western Dedicated Freight Corridors will be finalised very soon,” he said.

The CM said, “UP would be coming up with a new industrial policy to attract investment. Over 500 reforms have been made in labour and investor regulation to facilitate those willing to invest in the state.”

Raj Bhatt, president of Ashwamedh-Elara India Dialogue, who participated virtually, appreciated the measures taken by CM Yogi Adityanath.
