

# 'For \$5trn eco UP should share 20%'

►Continued from P 1

With a population of 240 million, our target is that Uttar Pradesh's share in the country's \$5 trillion economy should be around 20 per cent. For that, the Yogi government of the state has made many changes under the ease of doing business policy. In 2019, in the ease of doing the business rating, Uttar Pradesh jumped 12 places and secured the second position," the Minister said.

The Uttar Pradesh government is encouraging investors from Dubai to invest in hospitality, infrastructure, food processing, agro and food security, and real estate sectors.

Apart from Lulu Group, Alana Group, VPS Health Care and many other big names have shown interest in investing in the state.

Narendra Bhushan, Principal Secretary of PWD, said Uttar Pradesh is the only state from where 38 per cent of the country's total expressways pass by.
