

UPGIS-2023

Teaching, honing skills & providing jobs to youth are Yogi govt's priorities

Session on 'Decoding National Education Policy 2020' organized on the last day of Global Investors Summit

What's learnt, can't be forgotten: Hon'ble Higher Education Minister

Lucknow, February 12:

The UP government's main priorities are to educate, develop, and assist youths in getting employment through higher education. With the New Education Policy 2020, the government is committed to provide the youth with a bright future by connecting them with education. In view of this, a session on 'Decoding National Education Policy 2020' was held at Bhardwaj Hall-3 on Sunday, the last day of the Global Investors Summit.

During the session, eight investment proposals totaling more than Rs 6680 crore were received on the spot. This will provide employment to about 13000 people in the state.

Yogendra Upadhyay, Minister of Higher Education and Science-Technology, stated that the New Education Policy 2020 was created to link a new culture of education with the nation's progress. It is our goal to make education a medium of knowledge by connecting it to culture.

The Higher Education Minister gave the mantra, "Learning is more important than reading. Although it is possible to forget what was studied, one can never forget what was learnt. The new education policy is created around combining the modernism of today with the specialization of the past."

Education has to be linked with culture, employment, and technology. Education is more than just a degree; it is linked to knowledge—science, research. This should be the core. This education teaches how the family, society and nation are related to the world, he added.

State Government Minister Ashish Patel, Secondary Education Minister Gulab Devi, Minister of State for Higher Education Rajni Tiwari, Chief Minister's Education Advisor Prof. DP Singh, Vice Chancellor of Lucknow University Prof. Alok Rai, Principal Secretary of Higher Education Dr. Sudhir Bobde etc. were also present.
