

# Now, buying EVs becomes cheaper and easier in UP

**Lucknow:** The state government has notified the Uttar Pradesh Electric Vehicle Manufacturing and Mobility Policy 2022, making it easier and cheaper to purchase e-vehicles in the state.

The exemptions offered by the policy are in addition to the subsidies provided by the Centre on purchase of e-vehicles and will collectively reduce the cost of two-wheelers by Rs 15,000 to Rs 20,000 on road and cars by upto Rs 1 lakh. The policy, being implemented retrospectively from October 14, 2022, a day after it was cleared by the cabinet, makes an EV free of road tax and registration fee if it is purchased in the first three years of the policy period.
