

2 units of 660 MW under construction

►Continued from P 1

There is also a 333 MW hydro-electric power plant in Obra which helps in charging the thermal power plant. Presently, two new units of 660 MW each are under construction. With its commencement, the state will get the production of 1320 MW electricity.

Training to be imparted to outsourced personnel

Power Corporation will give training to its outsourced personnel to prevent untoward accidents which often occur during maintenance of power cables and infrastructure.
