

# 'Industrial consumers in G Noida pay lower tariff'

TIMES NEWS NETWORK

**Lucknow:** The industrial consumers in Greater Noida get the power supply at much lower tariff than other discoms, says the Noida Power Company Limited (NPCL), the discom in the area. "In its Greater Noida licence area, the NPCL not only provides 24-hour electricity to industries, but it also ensures that they get electricity at an affordable price. If we talk about industrial electricity tariffs in Greater Noida, the tariffs are relatively lower here than in other industrial areas," says a NPCL spokesperson.

The Regulatory Discount Programme enables the NPCL to provide financial relief to industrial units in Greater Noida. Under this regulatory discount applicable from August 4, 2022, industrial units in Greater Noida are saving a tentative Rs 0.83 per unit on their electricity consumption.

In the non-industrial and commercial categories, consumers are getting a benefit of tentative Rs 1.05 and Rs 1.08 per unit, respectively.
