Indore: Prime Minister Narendra Modi on Friday said technology will remain the core driver of employment in the era of the fourth Industrial revolution and there is a need to design new-age policies and find sustainable solutions.

“Skilling, re-skilling and up-skilling are the mantras for the future workforce,” said Modi in a video address to the G20 labour and employment ministers meet in Indore, Madhya Pradesh stressing on skilling the workforce with the use of advanced technologies and processes.

The prime minister said that the world is at a threshold of some of the greatest changes in the employment sector and there is a need to prepare responsive and effective strategies to address rapid transitions. “India has the potential to become one of the largest providers

of skilled workforce in the world, and a globally mobile workforce is going to be a reality in the future,” said Modi emphasizing G20’s role in globalizing the development and sharing of skills.

Talking about Swachh Indore, the Prime Minister said that the host city is home to many startups leading a new wave of transformations and the city takes pride in its rich culinary traditions.

Sharing statistics, information and data regarding employers and workers will empower countries across the globe to formulate evidence-based policies for better skilling, workforce planning, and gainful employment, the PM said.
