Lucknow: In a fitting tribute to the nation on Independence Day, the Indian Navy was equipped with an indigenous kit for carrying out rescue missions in the deep sea.

Dubbed as the Search and Rescue Kit (SARK), this Made in India lifesaving and support equipment can be dropped from aircraft with the help of parachutes. It's a quick response equipment that can rescue people in emergency situations. Each SARK can accommodate eight people and contains food for 15 days.

The raft-like equipment also has a float marker at the
