

# UP will soon become India's leading economy, says Yogi

## 'Good L&O, Tough Decisions Behind Visible Change'

**Lucknow:** Chief Minister Yogi Adityanath on Tuesday said Uttar Pradesh would soon become the leading economy in the country. "Over the past few years, UP has emerged as a developing state as opposed to its earlier perception of a BI-MARU state.

Improved law and order as well as hard decisions taken by the government to ensure that organised crime was brought down to zero are behind the change," Yogi said while addressing a Ficci national executive meeting.

The CM said the previous governments were responsible for bringing the

Yogi at a Jhansi event to mark birth anniversary of Major Dhyhan Chand state down from the path of development. TNN
