The 16th edition of CPHI & PMEC India Expo will be held at the India Expo Mart and Centre in Greater Noida.

The event, along with its ancillary programmes, spotlights technological strides pivotal in propelling India's pharmaceutical machinery, technology, and ingredients sectors, it added.

The Indian pharmaceutical industry, on the brink of significant expansion, eyes a projected CAGR of 13 per cent, eyeing a market value of USD 102.7 billion (Rs 8.5 lakh crore) by 2028, according to a statement.

"In 2023, the Indian pharma industry is experiencing the 'Rise and Rise of India' a perfect blend of a strong domestic manufacturing base, increasing innovation, and robust government support," Yogesh Mudras, Managing Director, Informa Markets in India said.

"With objectives laid down during the G20 presidency, the industry in India is poised to scale to USD 65 billion by 2024 and surpass USD 130 billion by 2030, driven by heightened pharmaceutical innovation, technological advancements, and a focus on breakthrough products," he said.

Mudras said a vaccine manufacturing powerhouse, India leads by supplying over 60 per cent of global vaccine demand..

"The future involves a growing production capacity, collaboration with private players, and a commitment to training 30 million professionals in digital skills by 2026," he added.
