How India's New-Age Manufacturing Ecosystem Is Pushing Homegrown Pioneers Like CDIL To Reshape The Semiconductor Industry

ANKIT SAXENA

Monday, November 13, 2023 12:00 pm IST

Big boost for Semiconductor industry.

The future of the semiconductor and electronic manufacturing industry in India over the next eight to 10 years is incredibly promising. The current policies and government support have laid a strong foundation for the industry's growth and development.

Pankaj Gulati, executive vice-president and chief operating officer of Continental Device India Limited (CDIL) said this during an interaction with *Swarajya*.
