

CM: Consult stakeholders before finalizing GH policy

Lucknow: Stressing on the need to combat global warming and climate change, chief minister Yogi Adityanath has pushed for the implementation of the green hydrogen policy.

The CM reviewed draft policy on green hydrogen and directed officials to consult stakeholders before finalising the same. He asked them to study relevant policies of other states before finalising the draft. Under the proposed 'Green Hydrogen Policy-2023',

two centres of excellence for green hydrogen research and innovation will be set up in UP. Besides, it talks about the state's aim to produce 0.5 million metric tons of green hydrogen annually by 2028 and by 2023, to become a leader in Green Hydrogen and ammonia production with 100% utilisation.

The draft also speaks about identifying areas in the state with hydrogen consumption and to promote the growth of green hydrogen and ammonia production there. TNN
