

AYODHYA IS POISED HAVE THE LONGEST SOLAR-POWERED STREET IN THE WORLD

SOLAR PARK IN AYODHYA CONNECTED WITH THE CITY'S STREETLIGHTS

World's largest 'solar-powered streetlights line' in Ayodhya

Uttar Pradesh CM Yogi Adityanath's vision to transform Ayodhya into a solar city is set to get a boost through establishment of the world's largest 'solar powered streetlights line', with the installation of 470 solar streetlights over an area of 10.2 km city between Guptar Ghat and Nirmali Kund.

The unique feat will also see Ayodhya find entry into the Guinness Book of World Records once again, with the earlier one taking place during Deepotsav with the lighting of the highest number of earthen lamps.

Under the guidance of CM Yogi, the Uttar Pradesh New and Renewable Energy Development Agency (UPNEDA) has already completed approximately 70% of the installation work, while the remaining 160 solar street lights will be installed before January 22.

According to a project officer of , UPNEDA, Ayodhya, "By January 22 world record will be established in Ayodhya by installing 470 solar street lights in a 10.2 km stretch from Lakshman Ghat to Guptar Ghat, extending up to Nirmali Kund of which 70 per cent has been completed

while the remaining 30% will be finished soon."

310 solar lights have been installed from Lakshman Ghat to Guptar Ghat, while work is ongoing to install 160 solar-powered streetlights in the stretch between Guptar Ghat and Nirmali Kund, covering a stretch of 1.85 km. All these solar-powered streetlights are LED-based, operating at 4.4 watts, and equipped with smart technology.

Through their installation, the 10.2 km stretch from Lakshman Ghat to Nirmali Kund will be illuminated with a radiant glow.
