Tata Power has collaborated with the Ayodhya Development Authority (ADA) to introduce electric vehicle (EV) charging points across Ayodhya, promoting sustainable transportation. Gaurav Dayal, the Commissioner of Ayodhya, and representatives from Tata Power inaugurated the initiative at the Collectorate Office MLCP Parking.

The event showcased the launch of four electric vehicles set to travel to neighbouring cities, connecting Ayodhya through EV charging points on routes like Ayodhya to Lucknow via NH27, Ayodhya to Raebareilly via NH330, Ayodhya to Prayagraj via NH330, and Ayodhya to Gorakhpur via NH27. This initiative aims to revolutionise travel experiences and encourage e-mobility adoption among pilgrims and tourists visiting Ayodhya.

The company's commitment to Uttar Pradesh's EV charging infrastructure is evident with its extensive EZ Charge network, boasting 4137 home chargers, 230 public charging points, and 39 captive chargers. Deepesh Nanda, CEO of Tata Power Renewable Energy Ltd, emphasised the project's significance in advancing a greener future and India's journey towards net zero emissions. Commissioner Gaurav Dayal lauded the partnership with Tata Power, highlighting Ayodhya's commitment to eco-conscious progress. The company's expansive EV charging network spans over 490 cities and towns, offering diverse charging solutions and marking its leadership in promoting eco-friendly transportation.
