

## Experion Developers launches first EV parking apartments in Uttar Pradesh

---

Tuesday, 16 Apr 2024

Experion Developers, a wholly owned subsidiary of Experion Holdings, Singapore, has launched the first electric vehicle (EV) parking apartments in Noida, Uttar Pradesh under its project, Experion Elements. The unveiling of these cutting-edge apartments signals a progressive shift towards eco-friendly and technologically advanced living spaces.

With sustainability at the core, Experion Elements redefines urban living by integrating innovative solutions which cater to the evolving needs of modern homeowners. These pioneering apartments feature charging infrastructure, designed to accommodate electric vehicles of various makes and models, thus eliminating the need for external charging stations and ensuring seamless integration of electric mobility into the residents' daily lives.

Additionally, Experion Elements offers a host of premium amenities and facilities, including landscaped gardens, recreational spaces, and security features, ensuring a holistic and enriching living experience. Aiming to provide future-ready infrastructure to move towards sustainable transportation options, with the launch of this sustainable project, Experion Elements has set a new standard for eco-conscious urban living, paving the way for a greener and more sustainable future.

Renowned for upholding the highest standards of real estate excellence and innovation, Experion Developer's foray into Noida underscores its dedication to catering to the evolving needs of homebuyers and investors in the
