**NEW DELHI:** Steel and automotive player Pavna Industries on Monday said it has signed an agreement with EV player OLA Electric to supply auto components, marking an entry into the domestic EV sector. As part of the pact, it will provide auto components like ignition switches and latches to OLA Electric across its manufacturing plants in India from its manufacturing unit at Aligarh in Uttar Pradesh, Pavna Industries said in a statement.

"With this partnership, we are foraying into the two-wheeler electric vehicle segment," Pavna Industries Managing Director Swapnil Jain said.
