Uttar Pradesh’s IT and ITeS Policy stands as a beacon of opportunity, ushering in a new era of technological advancement and economic growth for the state. Rooted in the vision of creating a conducive ecosystem for the Information Technology (IT) and Information Technology Enabled Services (ITeS) sectors, the policy aims to harness the immense potential of these industries to drive innovation, create employment opportunities, and propel Uttar Pradesh towards becoming a leader in the digital economy.

At its core, the IT and ITeS Policy of Uttar Pradesh seeks to attract investments, foster entrepreneurship, and promote skill development in the IT and ITeS sectors. It offers a range of incentives and support mechanisms to encourage the establishment and growth of IT and ITeS enterprises in the state.

One of the key objectives of the policy is to promote the setting up of IT parks, technology hubs, and incubation centers across Uttar Pradesh. These centers serve as hubs of innovation and collaboration, providing startups and established firms with access to state-of-the-art infrastructure, networking opportunities, and support services to nurture their growth.

Furthermore, the policy focuses on developing a skilled workforce equipped with the latest technological competencies to meet the demands of the industry. It emphasizes the establishment of training programs, skill development initiatives, and collaborations with educational institutions to bridge the gap between academia and industry requirements.
