We commend the Finance Minister's announcement on promoting pumped storage projects. Uttar Pradesh already has a robust policy in place for pumped storage, and this new initiative will empower our ongoing projects.

This policy will significantly enhance electricity production capabilities and ensure a reliable power supply, aligning perfectly with our commitment to sustainable energy solutions.

This initiative will bring substantial benefits to the people of Uttar Pradesh, notably our farmers, by facilitating improved irrigation and more stable energy access. By supporting the seamless integration of renewable energy into the grid, we can ensure a brighter and more sustainable future for all.
