New Delhi: [Indosolar Limited](#), a subsidiary of [Waaree Energies Limited](#), marked a significant advancement in India's solar manufacturing sector with the inauguration of a new solar module factory in [Noida](#), boasting a

production capacity of 1.30 GW. This development is set to catalyze job creation and support India's journey towards achieving net-zero emissions.

Located in Noida, the facility represents a strategic move by Waaree to lead in solar technology innovation while promoting [sustainable manufacturing practices](#). The facility is designed to utilize energy-efficient processes, thereby aligning with national objectives for an eco-friendly industrial growth.

Hitesh Doshi, Chairman and Managing Director at Indosolar, shared his vision at the inauguration, stating, "This new factory epitomizes our commitment to advancing solar technology and promoting sustainability. Through our manufacturing processes and our dedicated team's expertise, we aim to propel India's [renewable energy agenda](#) forward while creating employment opportunities for the local community. Moreover, this facility is expected to contribute towards fulfilling the surging demand for high-quality solar panels across the nation. We look forward to collaborating closely with our stakeholders to contribute towards the widespread adoption of solar power and to a more sustainable future for all."
