

Gati Shakti to augment infra, connectivity: Yogi

TIMES NEWS NETWORK

Lucknow: On the third anniversary of the National Gati Shakti project, Chief Minister Yogi Adityanath extended gratitude to Prime Minister Narendra Modi and said that the National Gati Shakti Master Plan is a crucial step to augment connectivity and infrastructure in the country.

“Multi-modal connectivity and accessibility through the project will boost the economy of the country as well as that of Uttar Pradesh. Inter-connecting road network with railways is a revolutionary step towards shaping a new India which has become possible due to PM Modi’s vision,” Yogi said.

He said that the master plan was a step forward to create a self-sustainable and developed country and it would speed up the logistics sector and improve connectivity.

“With a smaller budget and reduced travel time, PM

Gati Shakti is expected to create jobs for many youths and help them realize their goals,” said Yogi.

“The visionary plan of the PM will take society and the country on the path of economic development and progress. The project has provided renewed energy to the youths who are confident of achieving their dreams,” he said.

While dedicated eastern and western freight corridors would put manufacturers of UP on the global map, the multi-modal logistics and transport hub in Greater Noida-Ghaziabad region would help state-based businessmen look for opportunities within the domestic market, he said.

“With more than three dozen departments coordinating with each other to achieve the goals set under the master plan, UP is among the key beneficiaries of the Gati Shakti projects, schemes, and initiatives,” he added.
