

Govt's governance model transforms UP into a prime investment hub

PNS ■ LUCKNOW

Chief Minister Yogi Adityanath's commitment to security and transparent governance has redefined the state's industrial landscape over the past seven years, evident in the remarkable growth figures.

This was admitted even by Vice President Jagdeep Dhankhar who commended the Chief Minister Yogi Adityanath Yogi's government's progressive industrial policies during the UP International Trade Show in Greater Noida on September 25, 2024. Chief Minister Yogi Adityanath highlighted Uttar Pradesh's rapid transformation into a leading enterprise hub, crediting Chief Minister Yogi Adityanath's proactive governance.

"Chief Minister Yogi is playing on the front foot, ensuring good governance, which has brought about a 360-degree transformation in the state.

Today, UP is a top choice for global investors, thanks to its world-class infrastructure, including airports, expressways, and highways," Dhankhar had remarked.

Noida and Greater Noida have emerged as benchmarks for industrial development, with the upcoming Jewar International Airport set to propel the region further.

The area is poised to become a premier global investment destination, attracting interest from multinational corporations.

Similar growth trajectories are vis-

ible in Bundelkhand and Purvanchal, which are driven by enhanced connectivity and infrastructure.

Bundelkhand, now a solar energy hub, is witnessing a defense manufacturing corridor boost.

The government's ambitious plan to develop 33 villages across 36,000 acres between Kanpur and Jhansi under the Bundelkhand Industrial Development Authority (BIDA) aims to surpass Noida's industrial scale, marking the beginning of a new era of economic prosperity in the state.

The Yogi government has established the State Capital Region (SCR) by integrating five districts around Lucknow, modeled after the National Capital Region (NCR).

Plans include a 1,162-acre textile park on the Lucknow-Hardoi border and a 40-acre industrial hub in Lucknow's Amausi Industrial Area, featuring an IT Park, STP Park, incubation centre and state data centre.

This development aims to position the SCR on par with the NCR in the coming years.

In Bundelkhand, the government is linking the Bundelkhand Expressway to Chitrakoot via a new expressway, with a sanctioned budget of Rs 13 billion. Chief Minister Yogi Adityanath prioritises the development of Bundelkhand and Purvanchal, envisioning a prosperous future through initiatives like the defence manufacturing corridor. Additionally, the revived Gorakhpur

fertiliser factory, now with enhanced production capacity, symbolises the region's industrial resurgence.

Further boosting Gorakhpur's industrial growth, an 800-acre corridor along the Gorakhpur Link Expressway is underway.

Plans for a new 5,500-acre industrial city in Dakshinanchal aim to transform barren lands near Dhuriyapar into a thriving investment hub, positioning Gorakhpur as a key economic centre between Patna and Kathmandu.

The Chief Minister Yogi Adityanath government's special incentive scheme for industrial development focuses on Bundelkhand and Purvanchal.

Industrial corridors along state expressways will provide significant benefits, particularly with projects like the Bundelkhand-Chitrakoot Link Expressway and Purvanchal-Gorakhpur Link Expressway, driving regional economic growth and prosperity.

Some investment-related figures are proof of how keen industrialists from the country and the world are to invest in UP.

They include MoUs worth more than Rs 4.68 lakh crore signed and projects worth more than Rs 4 lakh crore implemented in UP Investors Summit; work has started on about 1,500 projects worth Rs 10.11 lakh crore in Groundbreaking Ceremony 4.0; 28,029 MoUs were agreed in UP Global Investors Summit, with investment proposals worth more than Rs 40 lakh crore.
