Goodluck India begins hydraulic tube manufacturing in UP's Bulandshahr

Goodluck India has officially started the commercial production of its hydraulic tube manufacturing plant in Bulandshahr, Uttar Pradesh. It is resulting in a key step in meeting the rising demand for high-quality hydraulic tubes. The plant, located in the Sikandrabad Industrial Area, began operations as per the scheduled timeline.

## Advanced technology for growing demand

The newly operational plant is equipped with cutting-edge technology, enabling it to supply hydraulic tubes to industries such as construction machinery, light commercial vehicles, and industrial equipment. This milestone highlights Goodluck India's commitment to expanding its capabilities and catering to the increasing demand for hydraulic tubes across various sectors.

In addition to the Bulandshahr plant, Goodluck India is also enhancing its CDW & ERW Tubes unit capacity at Bhuj in Gujarat. The capacity will increase from 80,000 tpa to 119,000 tpa in two phases, with Phase-I construction already completed and Phase-II awaiting approval.
