LUCKNOW : The state capital will have the AI-ready edge data centre at the HCL IT City campus at Sultanpur road. The Sify Infinit Spaces Limited will execute the project.

Chief secretary Manoj Kumar Singh presided over the ground-breaking ceremony on Sunday. The state-of-the-art data centre will be developed in four phases, with the first phase expected to become operational by June.

The facility is situated in the HCL IT city campus on Sultanpur Road, Lucknow. It uses edge caching—hardware and software-based components that store data to increase computing response time.

Chairman of Sify Technologies Limited, Raju Vegesna, and other senior officials were also present on the occasion. "The state government is building an AI City in Lucknow, and the overall stable investment environment aligns perfectly with the vision of the government in realising Uttar Pradesh's AI potential. Sify's expansion into Lucknow is a key milestone in realizing this vision," said Manoj Kumar Singh.
