

‘Semiconductor chip facility, rail orbital corridor next in city’

TIMES NEWS NETWORK

Lucknow: Lucknow is set to get a semiconductor chip manufacturing facility and a rail orbital corridor to enhance commerce and passenger transit, said defence minister Rajnath Singh.

He was speaking during a ‘senior citizen dialogue’ programme in Triveni Nagar on Wednesday before his departure to New Delhi.

“Semiconductor chips will soon be manufactured in Lucknow, with an investment of Rs 2,500 crore. Further, the state capital will have a rail orbital corridor to boost trade and transport,” the Lucknow MP said.

During his interaction with elderly, Rajnath praised armed forces remarkable courage in Operation Sindoor, mentioning that he had personally conveyed his appreciation to the military personnel involved.

He said Operation Sindoor represented India's most crucial anti-terrorism initiative and illustrated the country's resolute position against terrorist activities.

He highlighted that the operation was conducted with strategic accuracy, specifically focusing on military targets while ensuring civilian areas remained unaffected.

Mentioning about the success of Brahmos missiles in Operation Sindoor, Rajnath said he was happy to have virtually inaugurated its manufacturing unit in Lucknow recently. Deputy CM Brajesh Pathak and BJP functionaries Anand Dwivedi, Mukesh Sharma and Neraaj Bora were also present at the programme.
