

UP's GSDP to reach ₹29.6L cr: Planning dept

Lucknow: Uttar Pradesh's Gross State Domestic Product (GSDP) is projected to reach Rs 29.6 lakh crore in 2024-25. If this happens, the state would have recorded about 80% increase in GSDP compared to 2020-21.

This data was revealed by the planning department during a presentation before chief minister Yogi Adityanath on Monday.

The department also showed that in the same period, UP's share in the national economy rose from 8.4% to 8.9%.

Calling this a "significant achievement towards a self-reliant UP", Yogi said the govt should aim to increase this share to 10% by 2026. TNN
