

# Sify Techs to double its investment in UP

## Plan To Set Up AI Cities

TIMES NEWS NETWORK

**Lucknow:** Contributing to UP's vision of positioning the state as a global hub for digital innovation and AI, chairman and managing director of Sify Technologies, Raju Vegesna, announced plans to double the compa-

ny's investment in the state over the next three years.

Vegesna made this announcement after meeting with CM Yogi Adityanath in Lucknow on Tuesday. They discussed AI-led digital transformation and the proposed development of AI Cities in Lucknow and Noida.

Citing the CM, an official spokesperson said: "AI is set to bring transformative change across governance, industry, healthcare, educa-

tion, and manufacturing in the coming years. The UP govt is actively encouraging AI-based investments and innovation by building robust digital infrastructure and creating an enabling policy environment."

Vegesna informed the CM that Sify has invested over Rs 12,000 crore in the last five years in Uttar Pradesh, primarily for setting up state-of-the-art data centres in Lucknow and Noida.

Sify chairman shared that Sify's AI Edge Data Centre in Lucknow is nearing completion, and plans are

underway to develop a large hyperscale AI campus in its vicinity.

In Noida, Sify is operating North India's largest AI data centre campus, 'Noida-02', with another AI campus proposed alongside it. The company's first green hyperscale data centre, 'Noida-01', is already serving over 100 enterprise, govt, and hyperscale clients.

AI clusters in Lucknow and Noida will be seamlessly connected through Sify's national fibre network, enabling high-speed, low-latency AI workloads.
