ther boost the state’s digital economy ambitions. SA Technologies signed an MoU worth Rs 200 crore with Invest UP to establish a global capability centre (GCC) in UP.

The proposed GCC will offer advanced IT services, digital transformation solutions, and innovation-led capabilities to multinational enterprises, while creating high-value employment opportunities for skilled youth.”

The delegation, led by finance and parliamentary affairs minister Suresh Khanna, also held focused business-to-govt discussions with leading global organisations across sectors such as artificial intelligence, green hydrogen, global finance, advanced manufacturing, infrastructure development, clean technology, healthcare and public health partnerships. Officials said the interactions aimed to position UP as a preferred destination for next-generation industries and sustainable investments.

Key engagements included meetings with Eleven Labs, Essar Capital Advisory India, Verdagy, HCL Tech-

nologies, RMZ Infrastructure, Marsh McLennan, Agilent, BlackRock, Invisible Technologies, Indian Oil, Gavi-the Vaccine Alliance, Google, Boston Consulting Group, Topsoe and Marlan Space, among others.

Officials said the discussions explored investment opportunities, technology partnerships, and long-term collaboration aligned with UP’s development priorities.

The delegation also participated in thematic round-table discussions on ‘Clean mobility and energy storage: EVs, batteries and components’ and ‘Semiconductors, electronics and smart devices’, highlighting UP’s push to position itself as a hub for emerging technologies and advanced manufacturing. In another key development, NTPC Green Energy Ltd signed a non-financial MoU with the UP govt for the development of renewable energy and green hydrogen projects.

Officials said the partnership reinforces the state’s commitment to India’s energy transition goals and its long-term sustainable growth agenda.
