LUCKNOW: Uttar Pradesh's primary goal is to emerge as a one trillion dollar economy, with agriculture, MSMEs, manufacturing and services acting as key drivers, CEO of the State Transformation Commission Manoj Kumar Singh said on Thursday.

Speaking at a lecture titled 'Uttar Pradesh: One Trillion Dollar Economy - State GDP's Target' at the Lucknow University, Singh said true development must be reflected in the everyday lives of people.

He said several administrative reforms introduced since 2017 were now yielding results across sectors.

Highlighting the importance of agriculture, Singh said UP contributes nearly 25% to the country's agricultural output.
