UTTAR PRADESH

Factory count up 17%, crosses 32K mark

VIRENDRA SINGH RAWAT

Lucknow, 7 April

Indicating a growing manufacturing ecosystem, the number of registered factories in Uttar Pradesh has increased by over 17 per cent, crossing the 32,000 mark.

Compared to about 27,273 registered factories in 2024-25, the tally rose by 17.4 per cent — an increase of 4,746 — to reach 32,019 factories in 2025-26.

“The Uttar Pradesh government is focused on improving ease of doing business, creating an investor-friendly environment, and ensuring transparent procedures,” said state Labour and Employment Principal Secretary M K Shanmuga Sundaram. He added that Chief Minister Yogi Adityanath

envisions making the state the largest economy in India.

Uttar Pradesh is aiming to become a \$1 trillion economy by 2030 and a \$6 trillion economy by 2047 — goals that can be achieved only by accelerating the manufacturing sector across various domains.

To boost industrialisation, the state government has institutionalised a single-window system, enabled online clearances, developed expansive land banks and pushed major infrastructure development to enhance investor confidence.

According to official data, only 14,178 factories were registered in the state until April 2017. Over the next nine years, this number surged by 17,841 — a jump of 125 per cent — to reach 32,019 by March 2026.
