LUCKNOW: Invest UP on Monday invited private developers to develop next-generation industrial parks across the state.

In a decisive push to accelerate industrial infrastructure through private participation, Invest UP on Monday organised a developer-investor facilitation webinar, bringing together leading developers, global investors, and institutional funds to explore opportunities for devel-

oping plug-and-play industrial parks across the state.

Addressing the gathering, Invest UP CEO Shri Vijay Kiran Anand highlighted two newly launched policies—the Private Business Park Policy and the UP Plug-and-Play Industrial Shed Policy under the DBFOT model.

He noted that these initiatives are aimed at creating ready-to-move industrial ecosystems that can attract global companies, R&D centres, and Global Capability Centres (GCCs).

Reinforcing the state's growing appeal, the CEO highlighted its rapidly expanding infrastructure backbone—seven operational expressways, 15 upcoming corridors, and a robust aviation network comprising 16 domestic and five international airports.

The state's growth story is further driven by over 36 sector-specific policies, along with umbrella frameworks such as the Industrial Investment and Employment Promotion Policy (IIEPP) 2022 and the FDI/FCI Policy 2023, Invest UP said.

RK Singh, YEIDA CEO outlined the development vision of the Yamuna Expressway corridor, emphasising seamless connectivity and integration with the Noida International Airport at Jewar, where investment opportunities are vast.

The session witnessed participation from prominent industry players such as CREDAI, Adani APSEZ, Cushman and Wakefield, DLF, Zafar Sareshwala Group, Omaxe Group, Ajmera Realty, Sembcorp, DBS Bank and Infinity Group.
