Govt acquires over 300 hectares for logistics hub in Greater Noida

VIRENDRA SINGH RAWAT

Lucknow, 7 May

To position Uttar Pradesh (UP) as an industrial and cargo centre, the UP government has acquired over 300 hectares for a logistics hub in Greater Noida.

Of the 323 hectares earmarked for the Multi Modal Logistics Hub (MMLH), the government has so far acquired over 93 per cent of the land parcel totalling 301 hectares.

UP Chief Minister (CM) Yogi Adityanath has termed the

twin projects of MMLH and Multi Modal Transport Hub (MMTH) “game changers” for the logistics sector, which will connect the state to national and global supply chains.

These projects under the Multi-Modal Logistics Park (MMLP) Policy 2024 are to serve the Eastern & Western Dedicated Freight Corridors and Noida International Airport (NIA).

Against the backdrop of two mega projects, the NIA and the 594-km Ganga Expressway, the

UP government is propelling an array of big ticket infrastructure projects.

This robust pipeline includes expressways, logistics hubs, industrial parks, and bio energy projects, which are key to catalyse Uttar Pradesh's ambitious \$1 trillion economy roadmap.

The CM has directed the UP State Transformation Commission officials to accelerate the big projects like expressways, industrial parks, logistic hubs, and urban projects.
