Lucknow: Chief minister Yogi Adityanath on Wednesday issued directives to ensure availability of electric buses to facilitate commuting to and from Noida International Airport.

Presiding over the fourth meeting of the State Transformation Commission, the CM reviewed the progress of the operation of 500 electric buses across Noida, Greater Noida and YEIDA regions.

He emphasised that the public transportation system should be fully strengthened before the proposed commencement of flight operations on June 15. At least

CM Yogi said 110 electric buses will be introduced in first phase

110 electric buses will be introduced in the first phase.

Yogi also underscored the need for rapid expansion of charging infrastructure for electric vehicles across the state. Approximately 15.5 lakh electric vehicles are currently registered in the state, and the target is to develop 10,000 charging stations by 2030.

Around 2,500 charging stations are currently operational.
