Lucknow: UP’s ambition of becoming a one trillion dollar economy will be driven by sustained investment in infrastructure, industrial growth and an investor-friendly policy ecosystem, said minister of State for Industrial Development Jaswant Singh Saini on Friday at the seventh Uttar Pradesh Infrastructure Leadership Summit and Awards, 2026.

The minister said that UP had emerged as one of India’s most attractive investment destinations under chief minister Yogi Adityanath’s leadership.

Transport minister Dayashankar Singh said a robust transport network remained the backbone of economic progress. “The state’s expanding expressway network and improved connectivity were reducing logistics costs while facilitating trade, investment and tourism,” he said.

ACS, Tourism and Culture, Amrit Abhijat said, “Integrated destination development, improved connectivity, digital promotion are strengthening tourism’s contribution to the state’s economy,” he said.
