

UP AIMS TO DRIVE GREEN INVESTMENT & INNOVATION THROUGH IBET EXPO 2026

LUCKNOW: The Uttar Pradesh government is accelerating preparations for the India Bio-energy and Tech (IBET) Expo 2026, an international event expected to attract global investors, policymakers and clean energy experts to Greater Noida next month.

Chairing a high-level stakeholder meeting in Lucknow on Wednesday, urban development and energy minister AK Sharma said the three-day expo, scheduled from August 11 to 13 at the India Expo Centre and Mart, would serve as the state's biggest platform for investment, innovation and technology partnerships in the rapidly growing green energy sector.

The IBET Expo 2026 is being organised jointly by the Uttar Pradesh government and the Uttar Pradesh New and Renewable Energy Development Agency (UPNEDA), in collaboration with the Indian Federation of Green Energy (IFGE).
