

Factory registrations soar in UPSIDA areas

TIMES NEWS NETWORK

Lucknow: Factory registrations under Uttar Pradesh State Industrial Development Authority (UPSIDA) rose from around 1,400 in 2022-23 to nearly 3,300 in 2025-26. Officials pointed out that the increase was accompanied by the generation of over 50,000 jobs, as the authority expanded its industrial footprint across the state.

The authority has a land bank of over 55,000 acres, including around 2,000 acres of developed land available for industrial use. Its board has also approved around five new industrial areas, mainly along expressways and highways.

“Industry needs more than land. It needs reliable infrastructure, connectivity and the right ecosystem to operate efficiently,” said UPSIDA ACEO Deeksha Jain.
