

UP delegation at WEF 2024: Fostering connections and exploring synergies to drive growth

The Yogi Adityanath government in Uttar Pradesh is strategically positioning the state on the global stage during the ongoing World Economic Forum (WEF) 2024 in Davos, Switzerland.

The Yogi Adityanath government in Uttar Pradesh is strategically positioning the state on the global stage during the ongoing World Economic Forum (WEF) 2024 in Davos, Switzerland. Heading this initiative is a prominent delegation led by Infrastructure & Industrial Development Commissioner, Manoj Kumar Singh. The delegation, comprising key officials such as Amit Singh (Secretary to CM), Shashank Tripathi (Special Secretary to Chief Minister), and Anupam Shukla (Special Secretary to Govt. of UP and Director UPNEDA) is participating actively in the six-day event scheduled from January 14th to 19th.

The World Economic Forum (WEF) is internationally recognized for fostering dialogues on critical global issues, serving as a hub for influential figures from both public and private sectors. At this year's forum, hosted in the scenic town of Davos, Switzerland, leaders, thinkers, and decision-makers have gathered to engage in discussions aimed at shaping a sustainable and inclusive future for the world, as highlighted in a statement from the Uttar Pradesh government. The strategic involvement of the delegation underscores Uttar Pradesh's commitment to playing a meaningful role in these important global conversations.

Before embarking on this visit, Manoj Kumar Singh seemed to be enthusiastic about the delegation's participation at the forum. He said, "Uttar Pradesh is all set for global collaborations and investments. We believe in showcasing our strengths and engaging in meaningful discussions with industry leaders. The World Economic Forum provides an unparalleled platform to foster connections and explore synergies that can drive mutual growth."

As the leader of the Uttar Pradesh delegation, Manoj Kumar Singh aims to bring the state global recognition on the investment map at this prestigious gathering. The delegation, prioritizing economic development, is slated to engage with top executives from major multinational corporations like Nestle, AB InBev, Capgemini, PepsiCo, Coca Cola, Unilever, and Microsoft.

The focus of these interactions is to engage in discussions about potential investment opportunities and encourage these global corporations to view Uttar Pradesh as a lucrative investment destination. Invest UP, the investment promotion and facilitation agency for Uttar Pradesh, has established a state-of-the-art pavilion at Promenade 49 to carry out these important interactions. This pavilion acts as a comprehensive showcase, highlighting Uttar Pradesh's diverse strengths, from its robust business ecosystem to its vibrant tourism sector.

This strategic initiative aims to underscore the state's immense potential and foster a welcoming atmosphere for international investors. With its advantageous geographical location, skilled workforce, and progressive policies, Uttar Pradesh stands out as the perfect investment destination.

Uttar Pradesh prides itself on a thriving industrial landscape, flourishing particularly in sectors like information technology, manufacturing, and food processing. Beyond its economic strengths, Uttar Pradesh boasts a rich cultural heritage and diverse tourism offerings, presenting an appealing prospect for global investors seeking both economic prosperity and cultural enrichment.

As Uttar Pradesh positions itself as a burgeoning investment hub, the delegation's participation at the World Economic Forum 2024 signifies a significant step toward achieving global economic integration. The stage is now set for Uttar Pradesh to leave an indelible mark on the international business landscape.
