

JK Cement's capacity soars with newly added grinding unit in Prayagraj

JK Cement has commissioned a new grinding unit at its Prayagraj plant in Uttar Pradesh.

The Prayagraj plant is a 2mtpa clinker grinding unit project which will increase the overall capacity of the organization from 22mtpa to 24mtpa. This move allows the company to cater to the burgeoning demand for cement across the Eastern Uttar Pradesh.

The Prayagraj grinding unit is equipped with cutting-edge German technology, ensuring high energy efficiency and reducing input and fixed costs.

The government's heavy investment in infrastructure projects, including roads, bridges, and buildings, is expected to continue fueling growth.

Dr Raghavpat Singhania, MD, JK Cement, said, "As India accelerates its infrastructure development to sustain robust economic growth, we are continually scaling our capacities to cater to escalating demands from the infrastructure, housing, and construction sectors. Our commitment to quality, innovation, and contributing to the socio-economic development remains unwavering. We anticipate that these endeavors will not only foster our growth but also actively contribute to the overall development of the region and the nation."

Madhavkrishna Singhania, deputy MD and CEO, JK Cement, said, "This strategic addition not only ensures our steadfast role in nation-building but also ushers in an array of employment opportunities within the state. We are committed to operational brilliance and innovative contributions, amplifying growth and progress on both regional and national horizons."

Presently, JK Cement operates two functional units in Uttar Pradesh, situated in Aligarh and Hamipur with the capacity of 1.5mtpa and 2mtpa respectively.
