

UP records max factory registrations

Lucknow: The latest data from the govt of India's Annual Survey of Industries (ASI) revealed that Uttar Pradesh recorded the highest number of factory registrations in the country for the financial year 2024–25.

Data showed that as many as 3,318 new factories were registered in UP, nearly double the number registered in 2020–21 when the number stood at 1,484.

“The numbers speak for significant industrial growth spurts in the state's history. Of these newly registered factories, 460 units will employ more than 100 workers, signalling that Uttar Pradesh is no longer just a hub for small and medium enterprises but is also emerging as a prime destination for large-scale industrial investments,” said an official spokesperson.
