

# UP CM Yogi Adityanath inaugurates Shree Cement's new ₹1,000 crore unit in Etah

The project includes both the grinding unit and a dedicated 40MW solar power facility.

Uttar Pradesh Chief Minister Yogi Adityanath on Thursday inaugurated Shree Cement Limited's new grinding unit at Nigoh Hasnapur, Etah. According to a press release, the project, which involved a total investment of ₹1,000 crore, includes both the grinding unit and a dedicated 40MW solar power facility.

The Etah plant is expected to generate a significant number of direct and indirect employment opportunities, thereby contributing to the socio-economic development of the region and supporting ancillary industries.

"This unit reflects our commitment to Uttar Pradesh's future, by creating jobs, strengthening local industries and advancing sustainable growth," said Neeraj Akhoury, Shree Cement's Managing Director.

The new plant, designed with advanced German technology, is set to become a benchmark for efficiency and sustainability. A key feature of the facility is its commitment to green practices, including zero-waste operations and the use of air-cooled screw compressors to minimize water consumption.

The plant has collaborated with adjoining Jawaharpur Thermal Power Plant to process 100 per cent of the fly ash from the power plant, effectively recycling industrial waste and enhancing operational efficiency.

The facility is also equipped with robust pollution control systems to keep emissions well below regulatory norms.
